Whether I am working directly with your data, or building the front-end, I will take to it quickly and efficiently. I am a fast learner and work well in groups or alone. Since my education thus far has been on the topics of many things at once, I am capable of being a flexible asset to suit your needs. PLEASE VIEW MY WEBSITE:

Rice University via UTSA, Online Data Analytics Bootcamp — *Certificate soon!*

November 2021 - June 2022 (CURRENT)

Data Analytics Bootcamp: VBA, Excel macros, Python, Jupyter Notebook, GitHub, Matplotlib, pandas, Leaflet, JavaScript, HTML-5, Bootstrap, CSS, APIs, Flask

University of Texas at San Antonio — *Music, with focus in Education*

August 2008 - May 2013

PROGRAMS AND LANGUAGES

VBA, Excel macros, Python, Jupyter Notebook, GitHub, Matplotlib, pandas, Leaflet, JavaScript, HTML-5, Bootstrap, CSS, APIs, Flask, R, Tableau, SQL, PgAdmin, SQLite,

PROJECTS

Paranormal Traffic Webpage — *SQL, Flask, html, css, Python, Javascript, API, Leaflet*

Created a webpage that can access the sourced data, which has three interactive maps that show density of the three topics we chose. Group project.

https://github.com/JWatson1102/Project__3

Pymaceuticals Analysis — *Jupyter Notebook, Python, Matplotlib*

Created a Jupyter Notebook detailing data concerning lab mice and subsequent tumor sizes in relation to medications administered using statistics and data visualizations.

<https://github.com/radowtay/matplotlib-challenge>

IMDB Movie Data — *APIs, Jupyter Notebook, Python, Matplotlib*

Created theories concerning dataset, then used analytical tools to develop a presentation showing data renderings of our findings. Group project.

<https://github.com/radowtay/Project-1>

Weather Findings Webpage — *Jupyter Notebook, pandas, html, Bootstrap*

Used images from a previous project and created a webpage to detail and layout the findings from that project.
